## Weather Prognostications

Fred says everything points to "no min temp problems" for the next week --- and likely much longer , and precipitation on the showery type and rather minimal totals.

John Jackson says " if we make it through the full moon in Feb we are through with winter! I do not know how many times I heard that. I am sure that 75% of all growers over the age of 65 think that is true!! I never could convince them the full moon had no influence on cold weather. I might be wrong maybe it does (I have been confused once in a while)."

## FAWN Survey

Do you use FAWN for your weather information? They want your feedback (Doesn't everyone!). Please do take their [survey](#) and let them know what they can do to improve the site. It is very short!

## Organic Cover Crops

If you are interested in cover crops, you will want to take this survey to let the cover crop researchers know what research you want done in cover crops. [Survey](#).

## Research Update:

Acidification and Silicon in Blueberry Plants - Spanish researchers tested two types of acid for water acidification and tried adding silicon in the nutrient solution to see what blueberries responded to best. [Find out their results](#).

## Upcoming Classes - [Details and Registration for all classes](#).

WPS Train the Trainer - Feb. 6.

Blueberry Pest and Disease Update and ID - Feb. 13.

Citrus Fertilizer and Irrigation to help deal with HLB. - Feb. 20.
